MBA in Engineering Management Graduate Program

Master of Business Administration (MBA)

MBA

**ENGINEERING
MANAGEMENT**

Considering master's degree in engineering management makes you great! Many employers won't consider hiring people in a top position if they don't have a master's degree, and having additional education can also help you get a promotion if you're already working as an engineering manager.

As an engineering management student, you'll take some advanced management classes to be a better leader in practicing engineering concepts. MBA program in engineering management plays heavy on the business aspect of engineering management and is perfect for students who work (or want to work) in positions involved in engineering technology administration, finance, human resources, public relations, scheduling, and resources management for engineering companies or consulting with engineering projects.

In this field, the focus is on become a better engineering manager.

The thesis

A thesis on a particular topic of your choice (with a Supervisor's approval) will be completed by each student in the last semester. There is considerable scope in the choice of subject areas by the student and the research method employed. Each student is allocated a supervisor who guides them through the thesis. The thesis aims to assimilate the theoretical and practical elements of the academic program of study.

Duration of program: A Semester runs for a period of three months. Our "Master's Degree" programs are completed within the period of four semesters (one year). We allow extension in the period of study, in case your courses could not be completed within the stipulated time frame. No additional fee, no extra charge for extension in the period of study.

How to apply

Prospective student must complete the Admission Form and pay the processing fee of \$45 USD or its equivalent. The processing fee is refundable if admission is denied.
